- An Invitation And A Challenge → A Privilege and a Responsibility from knowing to seeking - it's not what we know, or what we don't know but what we think we know, that paves the way to life's misadventures.

→ Something that is believed is just as easily disbelieved and therefore discounted. The challenge to falsify what I suspect to be true encourages others to verify for themselves the validity of the claims I make.

Power - shared meaning
syn. POWER
FACULTY, FUNCTION:
ability of a living being to perform in a given way or capacity for a particular kind of performance
core 1: a central and often foundational part usu. distinct from the enveloping part by a difference in nature

2. ability to act or produce an effect
- gambol - analysis & synthesis
potential [to be powerful, master] is having or wielding force, authority, or influence: POWERFUL
2: achieving or bringing about a particular result: EFFECTIVE
- Core - power source
containment - limits, regulates, envelops (? matrix)
limits - modal - conditional stipulation
regulates - modal - containing provisions as to the mode of procedure or effect - used of a contract or legacy
envelops - projects the power
- ? Inclusive vs. Exclusive
4. of or relating to structure as opposed to substance

[to be able, to be powerful - more & potent]

- inherent vs. introduced conditions - boundary conditions... modal constants... conditioned entanglement

- resources are converted, and if all goes well, value is added. The results are beneficial.

- when all does not go well, a runaway reaction often occurs, usually with detrimental or destructive results.

- 'Standard Reference(s)' - regulates - modal - the value of which (e.g. thought instruments) is determined by the results they produce.
